Instructions can be found on the website www.vidaspace.co.nz and/or by contacting VidaSpace.
 - **Normal wear and tear:** Each lacquered wood floor following Industry Standards is subject to normal wear and tear. Wear and tear resulting from failure to observe Industry Standards for maintenance and useful recommendations by VidaSpace, are hereby excluded from this warranty. The following is only a partial exemplary list of Parky recommended use and maintenance procedures. For a complete list, we refer to the Industry Standards (for the U.S.: www.nwfa.org; for Europe and all other countries: www.parquet.net). Flooring can be cleaned with a slightly damp cloth, you should avoid excessive water

and the floor must be dried after cleaning. Flooring should not be cleaned by steam cleaners, carpet cleaners, polishes or any liquid cleaners not specifically approved by VidaSpace. Legs of furniture should be equipped with adequate protection material. Chairs or furniture on wheels must be equipped with soft wheels. A protective mat should be provided to offer protection under office chairs. Use of a vacuum cleaner with a beater bar head will damage the flooring, which damage is excluded from this limited warranty. Adequate protection at entrances for cleaning shoes is essential in order to avoid sand or grit. Breathable rugs or mats should be used in high traffic areas. Damage from liquid spills, stiletto heels, animal claws or nails, dropped objects or the like is not covered by this limited warranty. Flooring installed in bathrooms or other areas subject to spills or high humidity is not covered by this limited warranty.

- **Accidents** such as but not limited to scratches from moving heavy objects on the floor, impact damage, consequential damage, fire, natural disaster, or any circumstance other than normal usage.
- **Humidity** damage and deformation of the floorboards due to unusually low (below 40%) or high (above 60%) humidity conditions.
- **Normal colour and structure variation:** wood is a natural product. There are no two identical trees and therefore each board is unique and has natural colour and structure variations. Small marks such as but not limited to knots and mineral streaks are naturally occurring and have no effect on the quality of the floor.
- **Difference between production batches:** As wood is a natural product, there will be variations. VidaSpace strongly advises the installer to use the same production batch per room in order to obtain the most uniform result. You can find the production number on the backing of each board and we highly recommend not mixing two different batches.
- **Discoloration:** each wooden floor is subject to discoloration. Under the influence of sunlight, the colour of the wood may either darken or lighten. This is a natural process.
